# Sidhanshu Udawat

Senior Software Engineer at AutoScout24
Munich

## Summary

--- if you are a recruiter, please DO NOT waste your message credits on me since I'm not considering a move in any foreseeable future ---

I have hands on experience on many different parts of the flow and I love working on every aspect of the product which is from thinking about user experience to getting my hands dirty deep in code and challenging technical problems.

I use the following technology stack for Android Development:

• Kotlin for all new development and Java because of legacy code.
• I write code without side effects and which is testable.
• Android Jet Pack Components and have experience working on important components.
• MVVM and MVP
• Experience working on Reactive programming using RxAndroid / RxJava
• Git for source control.
